## SUBJECT INDEX

### KEY TO ABBREVIATIONS

A, abstract of meeting paper

CR, case report

E, editorial

H, history

L, letter

O, opinion

obit, obituary

R, review

S, symposium paper

SM, Selected Method

SN, scientific note

#### AACC

abstracts, 26th national meeting, 843  
ad hoc committee on radionuclides and  
radioassay, 1593  
board of directors meets, 101  
business office moves, 101  
Chicago clinical chemist awards, 1594  
Clinical Chemistry air speeded, 1099  
conf. on clinical biochemistry of the  
neonate, 1484  
enzyme study groups, 1593  
local section officers, 1974, 312  
national meeting, 1974, 101  
national meeting, 1974, 312  
national meeting, 1974, 407  
national meeting, 1974, 521  
national meeting, 1974, 636  
Pine Mountain conference on diagnostic  
immunochemistry, 1486  
roundtable breakfasts, 854  
scientific program, 26th national meeting,  
703  
standing committees 1974, 103  
symposia, 26th national meeting, 843  
training of clinical chemists in the U. S.,  
1251

Warner-Lambert (General Diagnostics)  
Lectureship, 843  
Warner-Lambert Lecturer, 1974, 636  
workshops, 852

Abbott Bichromatic Analyzer  
rapid bichromatic analysis of serum  
calcium (A), 908  
semi-automated ultramicro detn. of  
conjugated and total serum bilirubin  
with a Bichromatic Analyzer (A), 870

ABO-100  
evaluation and normal values for  
enzymatic detn. of cholesterol using the  
ABO-100 (A), 859

Absorbance measurements  
absorbance measurements at various  
spectral bandwidths (L), 1243

#### Abused drugs

See Drug assay, Toxicology

#### Accuracy

approaches to accuracy in clin. chem.  
methods (A), 877

are quality-control sera reliable for  
assessment of laboratory accuracy in  
collaborative studies? consequences for  
laboratory accreditation (A), 877  
criteria for judging precision and  
accuracy in method development and  
evaln. 825

expanded concept of precision and  
accuracy (A), 877

single parameter for accuracy and  
precision (A), 876

variation of within-day and day-to-day  
precision of the AcuChem  
Microanalyzer with serum constituent  
level (A), 903

#### Acetaminophen

acetaminophen metabolism in man, as  
determined by high-resolution liquid  
chromatography (S), 1086

#### Acetyl-glucosaminidase

increased  $\beta$ -N-acetyl-glucosaminidase  
activity in diabetes mellitus (SN), 1229

#### Acetylisoniazid

mass phenotyping of isoniazid  
inactivators by automated detn. of  
acetylisoniazid in urine, 639

#### Acetylneurameric acid(s)

See Sialic acids

#### Acta II

assay of aspartate aminotransferase  
activity: effects of serum and serum  
proteins on oxaloacetate  
decarboxylation and dialysis, 454

#### AcuChem Microanalyzer

optimization of the AcuChem  
Microanalyzer by statistical analysis  
(A), 855

variation of within-day and day-to-day  
precision of the AcuChem  
Microanalyzer with serum constituent  
level (A), 903

#### Adrenocortical function

single-antibody technique for  
radioimmunoassay of cortisol in  
unextracted serum or plasma, 365

#### Agglutination reactions

instrumental detection system based on  
light scattering for performing assays  
in which agglutination reactions are  
used (S), 1023

#### Alanine aminotransferase

effects of LD isoenzymes on the coupled  
enzymatic assay for alanine  
aminotransferase activity (A), 887  
sources of error in spectrophotometric  
measurement of aspartate  
aminotransferase and alanine  
aminotransferase activities in serum,  
43

#### Albumin

evaln. of commercial plates for the  
immunochemical-quantitation of  
albumin and immunoglobulin G in  
human cerebrospinal fluid (A), 900  
improved automated method for detn.  
serum albumin with bromcresol green  
(SN), 617

manual immunonephelometric assay of  
proteins, with use of polymer  
enhancement, 1181

measurement of IgG and albumin content  
of cerebrospinal fluid, and its  
interpretation, 571

nondialyzable factor in the interaction of  
calcium and human serum albumin (A),  
874

polymer enhancement of automated  
immunological nephelometric anal., as  
illustrated by detn. of urinary albumin,  
415

#### Alcaptonuria

interference with measurement of  
3-methoxy-4-hydroxymandelic acid and  
5-hydroxyindoleacetic acid by reducing  
metabolites (SN), 607

#### Alcohol

alcohol and chemical testing in the U. S.:  
a resume and some remaining problems  
(R), 126  
biol. aspects of breath-alcohol analysis,  
294

#### Alkaline phosphatase

alkaline phosphatase in serum & body  
fluids in cancer patients (A), 895  
clinical evaln. of a chem. inhibition  
method for measuring alkaline  
phosphatase isoenzymes in serum (A),  
887

evaluation of matrix effects on the  
dilution of serum creatine  
phosphokinase, alkaline phosphatase,  
lactate dehydrogenase and aspartate  
transaminase (A), 887

kinetic study of heat stability of alkaline  
phosphatases. application to sera with  
normal alkaline phosphatase activities  
(A), 888

manufacturer-assigned values and  
observed values of alkaline phosphatase  
activity in commercial serum (L), 1244  
serum alkaline phosphatase isoenzymes  
(A), 897

serum alkaline phosphatase of patients  
with liver disease (A), 896  
use of a "three-isoenzyme diagram" in  
assessing activity of alkaline  
phosphatase isoenzymes, 816

#### Alpha-1-acid glycoprotein

possible mechanism of interaction  
between human alpha-1-acid  
glycoprotein and steroid hormones (A),  
874

#### Alpha-1-antitrypsin

automated bichromatic analysis of  
alpha-1-antitrypsin and its evaln. (A),  
898

#### Alpha fetal protein

isolation of a unique alpha fetal protein  
from cord blood (A), 888

#### American Association of Clinical Chemists

See AACC

#### American Society for Medical Technology

the purpose of the American Society for  
Medical Technology, 1099

#### Amines

detection of hydrophobic amines in  
fortified wines commonly used by drug  
dependent subjects (A), 859  
rapid liquid chromatography of  
polyamines in urine, plasma, and blood  
(A), 873

#### Aminoacidopathies

high resolution high-voltage paper  
electrophoresis system for detection  
and identn. of aminoacidopathies (A),  
890

#### Amino acids

interference by antibiotics in amino acid  
assays (L), 1477  
ion-exchange chromatography of amino  
acids in sweat collected from healthy  
subjects during sauna bathing, 1305

- thin-layer chromatographic screening of amino acids in plasma and urine of newborns, 1446
- Aminolaevulinic dehydratase**  
detn. of aminolaevulinic dehydratase acy. of human erythrocytes as index of lead exposure, 1287
- Δ-Aminolevulinic acid**  
comparison of four methods for detn. of Δ-aminolevulinic acid in urine, and evalm. of critical factors, 753  
interlab. evalm. of proficiency testing in urinary Δ-aminolevulinic acid anal., 749
- α-Amino nitrogen**  
simplified colorimetry of α-amino nitrogen in plasma, serum, or urine, 1553
- Aminotransferase assays**  
computer simulation and optimization, exemplified by enzyme-coupled aminotransferase (transaminase) assays, 1403
- Aminotransferases**  
decreased aspartate aminotransferase acy. in serum of uremic patients, 1213  
Mn, Cu, and Zn concns. in serum and packed blood cells during acute hepatitis, chronic hepatitis, and posthepatitic cirrhosis, 1141
- Amniotic fluid**  
assessment of fetal maturity by amniotic fluid analysis of lecithin/sphingomyelin ratio (A), 889  
automated method for the detn. of fructose and its application to bovine fetal fluids (A), 879  
comparison of four indexes to fetal pulmonary maturity, 486  
comparison of visualization methods used to measure the lecithin:sphingomyelin ratio in amniotic fluid, 1408  
detn. of cholesterol in amniotic fluid (A), 906  
molybdenum blue reagent in detn. of lecithin:sphingomyelin ratio in amniotic fluid (L), 513  
palmitic acid content of amniotic fluid lecithin as an index to fetal lung maturity, 1431  
rapid thin-layer chromatographic method for assessing the lecithin:sphingomyelin ratio in amniotic fluid (SM), 1368
- Amphetamine**  
fluorescamine as a fluorogenic reagent for d-amphetamine identification by thin-layer chromatography (L), 88  
rapid gas-chromatographic detn. of amphetamine and methamphetamine in urine (SN), 1460  
thin-layer chromatographic differentiation of amphetamine from other primary-amine drugs in urine (SN), 302  
use of fluorescamine (Fluram) to detect amphetamine in urine by thin-layer chromatography, 272
- Amylase**  
amylase vs lipase in the diagnosis of acute pancreatitis (A), 880  
automated chromogenic amylase (A), 880  
chromogenic-substrate method for demonstrating multiple forms of alpha-amylase after electrophoresis, 324  
new substrate for the detn. of serum amylase (A), 880  
reaction rate nephelometer for amylase and lipase detns. (A), 896  
reassessment of clin. significance of elevated serum and urine amylase using a chromogenic method (A), 880  
reinterpretation of hyperamylasemia in diabetic coma, 673  
standardization of an α-amylase kit procedure (L), 96  
standardization of Phadebas α-amylase procedure (L), 91
- Amylase-binding substance(s)**  
affinity characteristics of amylase-binding substance(s) prep'd. from macroamylase complexes, 22
- Amylosis**  
column-chromatographic studies of isoamylases in human serum, urine, and milk, 547  
nature of isoamylases released, by acidn. from macroamylase complexes, 26
- Analytical error**  
See Variation, source of adaptation of the glucose oxidase: peroxidase-3-methyl-2-benzothiazolinone hydrazone-N,N-dimethylaniline procedure to the SMA 12:60, and comparison with other automated methods for glucose, 595
- assessment of the Reference Method for detn. of total Ca in serum, 1324  
definition and unbiased measurement of stability (A), 890  
detection and measurement of total bilirubin in serum, with surfactants as solubilizing agents, 447
- ill-wind in direct analysis of plasma (L), 402**
- photometric errors in equilibrium and kinetic analyses (A), 891  
prerinsing disposable polypropylene pipet tips (SN), 497  
sources of error in determining lead in blood by AAS, 205  
systematic bias between blood-pH instruments, 1341  
technology of manually-operated sampler pipets, 320  
trace-element analysis in hair: an evaluation, 148  
Tris buffers for qual. control of blood pH, 1337
- Angiotensin I converting enzyme**  
angiotensin I converting enzyme of human serum: purification by affinity chromatography and elevation in diseases of the lung, kidney and liver (A), 887
- Antibiotics**  
interference by antibiotics in amino acid assays (L), 1477  
radiometric enzymatic assays for aminoglycoside antibiotics in the clin. lab. (A), 897
- Antitrypsin**  
measurement of antitrypsin in serum, by immunodiffusion and by enzymatic assay (SM), 396
- Arteriosclerosis, risk factor detection**  
clin. chem. and risk factor detection (A), 881
- Ascorbic acid**  
electrochem. detection of selected org. components in eluate from high-performance liquid-chromatography (S), 992
- Aspartate aminotransferase**  
assay of aspartate aminotransferase activity: effects of serum and serum proteins on oxaloacetate decarboxylation and dialysis, 454  
evaluation of LDH and GOT performance by Hycel Marlk X in diabetic patients (A), 898  
evaluation of matrix effects on the dilution of serum creatine phosphokinase, alkaline phosphatase, lactate dehydrogenase and aspartate transaminase (A), 887  
sources of error in spectrophotometric measurement of aspartate aminotransferase and alanine aminotransferase activities in serum, 43  
variability in assay of aspartate aminotransferase activity: origin, magnitude and elimination (A), 887
- Atomic absorption**  
2-amino-2-methyl-1-propanol as the alkalinizing agent in an improved continuous-flow cresolphthalein complexone procedure for Ca in serum (SN), 1458  
detn. of oxalic acid in urine by AAS, 1444  
Atomic absorption spectrometry  
detn. of Cu in plasma and serum by use of a microsampling cup in atomic absorption spectrometry, 1199
- Atomic absorption spectrophotometry**  
comparative study of a micro-scale test for lead in blood, for use in mass-screening programs, 582  
detn. of total and inorganic mercury in hair by flameless AA, and of methylmercury by GC, 222  
micromethod for determining total iron-binding capacity by flameless AAS, 360  
sources of error in determining lead in blood by AAS, 205  
ultramicro direct detn. of erythrocyte lead concn. by AAS, with use of a graphite-tube furnace, 183
- Atomic absorption spectroscopy**  
discrete sampling dilutor used in atomic absorption spectroscopy, with a modification permitting simultaneous anal. for total Ca and inorganic P (SN), 838
- ATP**  
effect of energy-rich compounds on release of intracellular enzymes from human leukocytes and rat lymphocytes, 1331
- Authors**  
information for authors, 1
- AutoAnalyzer**  
adaptation of the glucose oxidase: peroxidase-3-methyl-2-benzothiazolinone hydrazone-N,N-dimethylaniline procedure to the SMA 12:60, and comparison with other automated methods for glucose, 595  
adaptation of the ultraviolet (340 nm) serum phosphorous analysis for the SMA 12/60 automated analyzer (A), 903  
2-amino-2-methyl-1-propanol as the alkalinizing agent in an improved continuous-flow cresolphthalein complexone procedure for Ca in serum (SN), 1458

measurement of glucose-6-phosphate dehydrogenase and 6-phosphogluconate dehydrogenase activities in erythrocytes by use of a centrifugal analyzer, 1349  
measurement of serum uric acid on the Amino Rotochem Parallel Fast Analyzer (A), 868  
method and apparatus for repetitive sampling of sera specimens within a GeMSAEC analyzer during rotation (A), 903  
novel mod. of a parallel fast analyzer for light scattering measurements: kinetic measurement of IgG by laser-induced near forward light scattering with an Amino Rotochem system (A), 893  
optimal  $\alpha$ -oxbutyrate concn. for assay of  $\alpha$ -hydroxybutyrate dehydrogenase activity in normal and pathological sera at 30 °C (SN), 494  
optimization and anal. applications of the techniques of dynamic introdn. of liquids into centrifugal analyzers (S), 932  
performance of the CentrifilChem in routine laboratory work (A), 866  
small portable Centrifugal Fast Analyzer system (S), 1003  
specific protein anal. by light-scatter measurement with a miniature Centrifugal Fast Analyzer (S), 1055  
stability in urea as a measure of cardiac lactate dehydrogenase on the centrifugal analyzer, 769  
techniques for loading liquids into the rotor of the miniature Centrifugal Fast Analyzer (A), 866  
two-point standard program for endpoint detn. of glucose by use of glucose oxidase and Rotochem II-Parallel Fast Analyzer (A), 879  
use of a laser-equipped centrifugal analyzer for kinetic measurement of serum IgG, 1320  
use of CentrifilChem Fast Analyzer for the estimation of morphine in urine (A), 901  
use of simplex method to optimize anal. conditions in clin. chem., 775  
use of the GeMSAEC for drug screening (A), 888  
versatile minidisc module for a centrifugal analyzer (S), 955
- Cephalothin**  
positive interference by cephalothin with Zimmerman reaction for 17-ketosteroids (L), 401
- Ceruloplasmin**  
measurement of ceruloplasmin from its oxidase acy. in serum by use of o-dianisidine dihydrochloride, 1556  
standardization of serum ceruloplasmin concns. in International Enzyme Units with o-dianisidine dihydrochloride as substrate, 1564
- Charcoal**  
use of charcoal to concentrate drugs from urine before drug analysis, 184
- Chemical ionization**  
chemical ionization, field desorption, and electrochemical techniques as tools for the clinical chemist (A), 844
- Chlordiazepoxide**  
possible interference by chlordiazepoxide or its metabolites with some clinical chemical procedures (SN), 1222
- Chloride**  
automated anal. of chloride and bicarbonate using consecutive dialysis (A), 872  
340 chloride determination on the SMA 12/60 & AA-II instruments (A), 872  
detn. of serum chloride and magnesium with the Clinicard system (A), 908
- Cholesterol**  
a rapid, fluorometric determination of cholesterol in serum using a modernized Salkowski reaction (A), 907  
characteristics of a cholesterol oxidase: peroxidase:o-dianisidine system for cholesterol (A), 859  
detn. of cholesterol in amniotic fluid (A), 906  
detn. of cholesterol in nonane extracts of serum (A), 858  
elimination of common interferences in direct determination of total serum cholesterol with the modified Liebermann-Burchard (Huang) reagent (A), 858  
enzymatic detn. of serum total cholesterol (A), 859  
enzymatic detn. of total cholesterol in serum (L), 724  
enzymatic detn. of total serum cholesterol, 470  
enzymatic detn. of total serum cholesterol (A), 859  
evaln. of an enzymatic procedure for detn. of serum cholesterol with the Abbott ABA-100, 1282  
evaluation and normal values for enzymatic detn. of cholesterol using the ABO-100 (A), 859  
influences on direct ferric perchlorate methods for detn. of serum cholesterol (A), 858  
interference with cholesterol detn. (L), 914  
mechanisms of the Liebermann-Burchard and Zak color reactions for cholesterol, 794  
new approach to anal. spectroscopy which uses a vidicon tube (A), 855  
prep. and evaln. of a water-soluble cholesterol standard, 482  
Salkowski-type water-compatible cholesterol micromethod (A), 907  
spectral interpretation and kinetic studies of the  $\text{Fe}^{3+}-\text{H}_2\text{SO}_4$  (Zak) procedure for detn. of cholesterol, 802
- Cholesterol ester hydrolase**  
enzymatic detn. of total serum cholesterol, 470
- Cholesterol esterification**  
esterification of cholesterol in glacial acetic acid (L), 90
- Cholesteryl hemisuccinate**  
prep. and evaln. of a water-soluble cholesterol standard, 482
- Cholinesterase**  
cholinesterase: total activity and dibucaine inhibition dets. made by use of the GeMSAEC fast analyzer (A), 904  
detn. of cholinesterase (A), 881  
half-life of serum cholinesterase (A), 881  
kinetic method for serum cholinesterase dets. using the Clinicard system (A), 881  
serum cholinesterase variant with suppressed synthesis of the usual cholinesterase (A), 881
- Chromatography**  
acetaminophen metabolism in man, as determined by high-resolution liquid chromatography (S), 1086

- affinity characteristics of  
     amylase-binding substance(s) prep'd.

     metabolites in body fluids of overdose  
     victims, 255  
 sepn. and quantitation of coproporphyrin  
     and uroporphyrin in urine, 1397  
 sepn. of tissue and serum creatine kinase  
     isoenzymes by ion-exchange column  
     chromatography, 36  
 specific automated method for  
     measurement of urinary  
     hydroxyproline, 544  
 technique for rapidly separating drugs  
     from biol. samples (SN), 307  
 thin-layer chromatographic  
     differentiation of amphetamine from  
     other primary-amine drugs in urine  
     (SN), 302  
 thin-layer chromatographic screening of  
     amino acids in plasma and urine of  
     newborns, 1446  
 urinary excretion of non-nitrogenous  
     organic acids by healthy infants and  
     children, 603  
 use of charcoal to concentrate drugs from  
     urine before drug analysis, 184  
 use of fluorescamine (Fluram) to detect  
     amphetamine in urine by thin-layer  
     chromatography, 272  
 use of XAD-2 resin for detection of abused  
     drugs in urine, 177
- Chromium**  
 direct detn. of chromium in blood serum  
     and plasma by flameless atomic  
     absorption spectrophotometry (A), 885  
**Chromosomes**  
 DNA cytophotometry of chromosomes in  
     a case of chronic myelogenous leukemia  
     (S), 1080  
**Cirrhosis**  
 Mn, Cu, and Zn concns. in serum and  
     packed blood cells during acute  
     hepatitis, chronic hepatitis, and  
     posthepatitic cirrhosis, 1141  
 multivariate anal. of serum protein  
     assays in chronic hepatitis and  
     postnecrotic cirrhosis, 428  
**Citrate**  
 enzymatic citrate assay by fluorometry  
     (A), 877  
**Clinical Chemist, The**  
 101, 312, 407, 521, 636, 729, 921, 1098,  
     1251, 1484, 1593  
**Clinical trials**  
 clin. chem. and multi-center clinical trials  
     (A), 850  
**Clinicard system**  
 detn. of serum chloride and magnesium  
     with the Clinicard system (A), 908  
 direct measurement of serum iron and  
     iron binding capacity using the  
     Clinicard system (A), 902  
 direct method for detn. of total serum  
     globulin using the Clinicard system (A),  
     875  
 method for detn. of direct bilirubin using  
     the Clinicard system (A), 871  
 rapid detn. of serum and urine creatinine  
     with a kinetic method on the Clinicard  
     system (A), 899  
 uv detn. of inorganic phosphorus using the  
     Clinicard system (A), 886  
**Clot lysis**  
 feasibility of recording clot lysis with the  
     thermodetector, 1435  
**Coagulation**  
 thermal titration: application of  
     calorimetry to the study of plasma  
     coagn. (S), 1013  
**Collagen metabolism**  
 specific automated method for  
     measurement of urinary  
     hydroxyproline, 544  
**Colorimetry**  
 automated method for detg. serum  
     thiocyanate, to distinguish smokers  
     from nonsmokers, 1344  
 comparison of five methods for detn. of  
     2,3-diphosphoglycerate in blood, 649  
 detn. of aminolaevulinate dehydratase  
     act. of human erythrocytes as index of  
     lead exposure, 1287  
 enzymatic blood glucose detn. by  
     colorimetry of
- N,N-diethylaniline-4-aminoantipyrine  
     (SN), 606  
 furosemide concns. in serum and urine,  
     and its binding by serum proteins as  
     measured fluorometrically, 152  
 simplified colorimetry of  $\alpha$ -amino  
     nitrogen in plasma, serum, or urine,  
     1553  
**Competitive binding assays**  
 comments on "principles of competitive  
     binding assays" (L), 89  
 principles of competitive binding assays  
     (saturation analyses). II. sequential  
     saturation (R), 5  
**Competitive binding of ligands**  
 sepn. of free and protein-bound ligand  
     molecules by means of protein-coated  
     charcoal, 1146  
**Competitive protein binding**  
 anal. for total serum thyroxine by  
     equilibrium competitive protein binding  
     on small, re-usable Sephadex columns,  
     553  
 binding principle specific for folates as a  
     normal constituent of human serum,  
     1313  
 plasma cortisol detn.: radioimmunoassay  
     and competitive protein binding  
     compared, 411  
 practical detn. of total plasma cortisol by  
     use of competitive protein binding (SM),  
     1376  
 protein-binding assay for plasma  
     testosterone, after purifn. by column  
     partition chromatography, 430  
**Computers**  
 an evaluation of Supersmart—an on-line  
     quality control and report device for  
     sequential multiple analyzers (A), 904  
 automated computerized optimization of  
     clim. methods (A), 894  
 centrifugal analyzer with a new all-digital  
     measurement system (S), 942  
 computer-assisted electrophoretic pattern  
     interpretation (A), 892  
 computer calculation of corrected kinetic  
     and end-point chem. assays (A), 898  
 computer simulation and optimization,  
     exemplified by enzyme-coupled  
     aminotransferase (transaminase)  
     assays, 1403  
 detn. of glucose with a research model  
     Aminco "Rotocem" by the hexokinase  
     reaction, 15  
 evaluation of a transformation method for  
     estn. of normal range, 576  
 factors influencing the quality of anal.  
     methods—systems analysis, with use of  
     computer simulation, 738  
 identn. of free and conjugated metabolites  
     of methaqualone by GC:MS, 230  
 incorporation of a high-speed decimal  
     data processor into a centrifugal  
     analyzer (S), 950  
 interfacing with asynchronous serial  
     digital techniques provides cost-time  
     economies in the clin. lab. (A), 903  
 isolation of drugs and drug metabolites  
     from biol. fluids by use of salt-solvent  
     pairs, 282  
 laboratory instrument—computer  
     interface: new approach (A), 890  
**Contamination**  
 contamn. of distilled water, HCl, and  
     NH<sub>4</sub>OH with amino acids, proteins,  
     and bacteria, 687  
**Continuous-flow analysis**  
 See also AutoAnalyzer  
 a signal comparator to increase efficiency  
     of continuous-flow analyzers (SN), 78  
 chemical and clinical evaln. of the  
     continuous-flow analyzer "SMAC" (S),  
     1062  
 design and operation of a miniaturized  
     high-speed continuous-flow analyzer for  
     serum Na, K, Cl, and CO<sub>2</sub> (A), 857  
 glucose detn. with hexokinase on the Du  
     Pont *aca* compared with the Dow  
     Diagnostics glucose reagent on  
     continuous-flow systems (L), 1246  
**Copper**  
 simultaneous determination of copper and  
     iron in a single aliquot of serum, 188  
**Coproporphyrin**  
 sepn. and quantitation of coproporphyrin  
     and uroporphyrin in urine, 1397  
**Corrections**  
 612, 1367, 1588  
 Duponal-azobilirubin method for bilirubin  
     (L), 1588  
**Corticotropin**  
 plasma corticotropin radioimmunoassay,  
     with use of fuller's earth for extn. 682

- Cortisol**  
 automated colorimetric detn. of tetrahydro-11-deoxycortisol in human urine (A), 892  
 competitive protein-binding radioassay of urinary cortisol (SM), 1470  
 plasma cortisol detn.: radioimmunoassay and competitive protein binding compared, 411  
 practical detn. of total plasma cortisol by use of competitive protein binding (SM), 1376  
 single-antibody technique for radiimmunoassay of cortisol in unextracted serum or plasma, 365
- Coulometry**  
 evaln. of an automated selective-ion electrolyte analyzer for measuring  $\text{Na}^+$ ,  $\text{K}^+$ , and  $\text{Cl}^-$  in serum, 1217
- Creatine kinase**  
 automated fluorometric creatine kinase assay: measurement of 100-fold normal activity without serum dilution, 560  
 causes of increased plasma creatine kinase activity after surgery, 340  
 clin. applicability of creatine phosphokinase isoenzymes (A), 896  
 creatine kinase isoenzymes in muscular dystrophy (A), 865  
 creatine phosphokinase isoenzymes in surgery (A), 866  
 creatine phosphokinase standardization techniques for SMA analyzers (A), 876  
 effects of EDTA on the creatine kinase activity measurements in serum (A), 897  
 evaluation of matrix effects on the dilution of serum creatine phosphokinase, alkaline phosphatase, lactate dehydrogenase and aspartate transaminase (A), 887  
 sepn. of tissue and serum creatine kinase isoenzymes by ion-exchange column chromatography, 36  
 simple, qualitative method for visualization of the serum creatine phosphokinase mb isoenzyme (A), 888  
 simultaneous sepn. of serum creatine kinase and lactate dehydrogenase isoenzymes by ion exchange chromatography (A), 895
- Creatinine**  
 creatinine metabolism in humans with decreased renal function: creatinine deficit, 1204  
 kinetic enzymatic method for detn. either serum or urine creatinine (A), 871  
 new method for direct detn. of "true" creatinine, 1131  
 rapid detn. of serum and urine creatinine with a kinetic method on the Clinocard system (A), 899  
 ultramicro enzyme kinetic method for creatinine detn. (A), 871
- Creatinine clearance**  
 creatinine clearance predicted from a nomogram based on age, sex, body weight, and serum creatinine (A), 899
- Cyanmethemoglobin**  
 design of a portable solid-state hemoglobinometer (SN), 613
- Cystine**  
 detn. of cystine in urine of cystinurics treated with D-penicillamine (A), 871
- Cysts, breast**  
 carcinoeembryonic antigen-like material in fluid from benign cysts of the breast, 41
- Data processing**  
 statistical qual. control and routine data processing for radioimmunoassays and immunoradiometric assays (R), 1255  
 use of programmable desk top calculators for on-line data acquisition, computing, and printing of results from single and multichannel laboratory instruments (A), 890
- D-Deoxyribose**  
 automated proced. for detn. of sialic acids and 2-deoxyribose in blood and tissues, 1125
- Dexamethasone**  
 radioimmunoassay for dexamethasone in plasma, 266
- Diabetes**  
 contribution of blood phosphate esters to the blood saccharoid fraction of rats with alloxan-induced diabetes or treated with insulin or epinephrine, 1165  
 evaluation of LDH and GOT performance by Hycel Mark X in diabetic patients (A), 898  
 increased  $\beta$ -N-acetyl-glucosaminidase activity in diabetes mellitus (SN), 1229
- measurement of antibodies to insulin in serum, 1275  
 reinterpretation of hyperamylasemia in diabetic coma, 673
- Diabetes mellitus**  
 increased uropespinogen excretion in diabetes mellitus (SN), 610
- Diagnostic aids**  
 assay for spinal fluid glutamine, and values for children with Reye's syndrome, 642  
 automated measurement of protease-inhibitor capacity of serum, by use of chymotrypsin and casein, 328  
 causes of increased plasma creatine kinase activity after surgery, 340  
 comparison of electroimmunodiffusion and radial immunodiffusion for measurement of IgG in lab. diagnosis of multiple sclerosis, 1441  
 decreased aspartate aminotransferase acty. in serum of uremic patients, 1213  
 detn. of Cu in plasma and serum by use of a microsampling cup in atomic absorption spectrometry, 1199  
 differentiation of electrophoretically similar hemoglobins—such as S, D, G, and F; or A<sub>2</sub>, C, E, and O—by electrophoresis of the globin chains, 1111  
 enhancing effect of glutamate on apparent serum glutamyltranspeptidase activity, 317  
 high-resolution gas-chromatographic anal. of volatile constituents of body fluids, with use of glass capillary columns, 1105  
 identn. of hemoglobins and hemoglobinopathies by electrophoresis on cellulose acetate plates impregnated with citrate agar, 74  
 immunochem. measurement of lipoprotein-x, 676  
 measurement of ceruloplasmin from its oxidase acty. in serum by use of o-dianisidine dihydrochloride, 1556  
 measurement of IgG and albumin content of cerebrospinal fluid, and its interpretation, 571  
 one-hour radioimmunoassay of serum drug concns., as exemplified by digoxin and gentamicin, 1159  
 palmitic acid content of amniotic fluid lecithin as an index to fetal lung maturity, 1431  
 parameters affecting a method in which Sephadex is used to determine percentage of free thyroxine in serum, 1568  
 parathyroid hormone assay in primary hyperparathyroidism: experiences with a radioimmunoassay based on commercially available reagents, 369  
 plasma corticotropin radioimmunoassay, with use of fuller's earth for extn. 682  
 quant. gas-chromatographic detn. of short-chain fatty acids in aqueous samples (SN), 1235  
 radioimmunoassay of serum triiodothyronine on small reusable Sephadex columns, 1353  
 screening cord bloods for detection of sickle cell disease in Jamaica, 666  
 sepn. of tissue and serum creatine kinase isoenzymes by ion-exchange column chromatography, 36  
 stability in urea as a measure of cardiac lactate dehydrogenase on the centrifugal analyzer, 769  
 techniques of orthomolecular diagnosis (S), 961  
 ultramicro direct detn. of erythrocyte lead concn. by AAS, with use of a graphite-tube furnace, 163
- Diazepam**  
 quantitative determination of medazepam, diazepam, and nitrazepam in whole blood by flame-ionization gas-liquid chromatography, 141
- Digoxin**  
 faster and easier radioimmunoassay of digoxin, 343  
 methodological causes of discrepancies in radioimmunoassay for digoxin in human serum, 1194  
 principles of competitive binding assays (saturation analyses). II. sequential saturation (R), 5
- Diphenhydantoin**  
 detn. of diphenhydantoin (L), 515  
 detn. of diphenhydantoin (L), 915  
 detn. of diphenhydantoin (L), 1478
- 2,3-Diphosphoglycerate**  
 comparison of five methods for detn. of 2,3-diphosphoglycerate in blood, 649
- Displacement electrophoresis**  
 transphoresis and isotachophoresis: automatable fast anal. of electrolytes, proteins, and cells, with suppression of gravitational effects (S), 973
- DNA**  
 DNA cytophotometry of chromosomes in a case of chronic myelogenous leukemia (S), 1080  
 evaln. of a method for radioimmunoassay of antibody to native DNA (A), 884  
 use of enzyme-linked antibodies to measure serum anti-DNA antibody in systemic lupus erythematosus, 353
- Dopa**  
 electrochem. detection of selected org. components in eluate from high-performance liquid-chromatography (S), 992
- Dopamine**  
 potential source of error in fluorometric analysis of dopamine (L), 915  
 simultaneous automated estn. of noradrenaline and dopamine in brain tissue (SN), 81
- Dose-response curves**  
 principles of competitive binding assays (saturation analyses). II. sequential saturation (R), 5
- Doxepin**  
 rapid uv procedure for measuring doxepin and some doxepin metabolites in human urine, 692
- Drug abuse**  
 concn. of glutethimide and associated compounds in human serum and cerebrospinal fluid after drug overdose, 195  
 correlation of the EMIT urine barbiturate assay with a spectrophotometric serum barbiturate assay in suspected overdose (SN), 305  
 drug-abuse and control populations differentd. by a laboratory profile, 172  
 evaln. of immunoassay methods for detection in urine of drugs subject to abuse, 243  
 identn. of free and conjugated metabolites of methaqualone by GC:MS, 230  
 routine use of a flexible GC:MS:computer system to identify drugs and their metabolites in body fluids of overdose victims, 255  
 single-pH extraction procedure for detecting drugs of abuse (SN), 309  
 technique for rapidly separating drugs from biol. samples (SN), 307  
 thin-layer chromatographic differentiation of amphetamine from other primary-amine drugs in urine (SN), 302  
 use of charcoal to concentrate drugs from urine before drug analysis, 184  
 use of fluorescamine (Fluram) to detect amphetamine in urine by thin-layer chromatography, 272  
 use of XAD-2 resin for detection of abused drugs in urine, 177
- Drug assay**  
 See also Screening, Toxicology  
 electrophoretic sepn. of amphetamine and 3,4-methylenedioxymethamphetamine (L), 1381  
 furosemide concns. in serum and urine, and its binding by serum proteins as measured fluorometrically, 152  
 gas-chromatographic simultaneous anal. for glutethimide and an active hydroxylated metabolite in tissues, plasma, and urine, 236  
 GLC detn. of carbamazepine in plasma (SN), 492  
 GLC procedure for measurement of methylphenidate hydrochloride and its metabolite, ritalinic acid, in urine, 440  
 improved extn. technique for gas-liquid chromatographic detn. of methaqualone in serum (L), 1382  
 isolation of drugs and drug metabolites from biol. fluids by use of salt-solvent pairs, 282  
 modif. of an automated method for measurement of sulfamethoxazole and its major metabolite in biol. fluids, 288  
 new approach to derivatization and gas-chromatographic anal. of barbiturates, 192  
 qual. and quant. detn. of methaqualone in serum by GC, 249

quantitative determination of medazepam, diazepam, and nitrazepam in whole blood by flame-ionization gas-liquid chromatography, 141 radioimmunoassay for dexamethasone in plasma, 266 rapid gas-chromatographic method for quantitation of ethchlorvynol (Placidyl) in serum, 212 single-pH extraction procedure for detecting drugs of abuse (SN), 309 spectrophotometric detn. of ethchlorvynol in biologic specimens, 159 technique for rapidly separating drugs from biol. samples (SN), 307 thin-layer chromatographic differentiation of amphetamine from other primary-amine drugs in urine (SN), 302 Du Pont ACA adaptation of the glucose oxidase: peroxidase-3-methyl-2-benzothiazolinone hydrazone-N,N-dimethylaniline procedure to the SMA 12-80, and comparison with other automated methods for glucose, 595 quality-control considerations with the Du Pot Automatic Clinical Analyzer (aca) (SN), 698 Electrochemical techniques chemical ionization, field desorption, and electrochemical techniques as tools for the clinical chemist (A), 844 Electrochemistry electrochem. detection of selected org. components in eluate from high-performance liquid-chromatography (S), 992 Electrode, p(O<sub>2</sub>) immobilized glucose oxidase used to measure glucose in serum (S), 1018 Electroimmunoassay measurement of IgG and albumin content of cerebrospinal fluid, and its interpretation, 571 rocket immunoselection for detection of heavy-chain diseases, 1292 Electroimmundiffusion comparison of electroimmundiffusion and radial immunodiffusion for measurement of IgG in lab. diagnosis of multiple sclerosis, 1441 Electrolytes design and operation of a miniaturized high-speed continuous-flow analyzer for serum Na, K, Cl, and CO<sub>2</sub> (A), 857 evaln. of an automated selective-ion electrolyte analyzer for measuring Na<sup>+</sup>, K<sup>+</sup>, and Cl<sup>-</sup> in serum, 1217 evaln. of Technicon Stat/Ion Electrolyte Analyzer (A), 856 Electrophoresis automated elution electrophoresis, a potential clinical tool (A), 855 chromogenic-substrate method for demonstrating multiple forms of alpha-amylase after electrophoresis, 324 computer-assisted electrophoretic pattern interpretation (A), 892 differentiation of electrophoretically similar hemoglobins—such as S, D, G, and P; or A<sub>2</sub>, C, E, and O—by electrophoresis of the globin chains, 1111 electrophoretic demonstration of three extra lactate dehydrogenase isoenzymes in serum of a "normal" individual (SN), 841 identn. of hemoglobins and hemoglobinopathies by electrophoresis on cellulose acetate plates impregnated with citrate agar, 74 improved automated method for detn. serum albumin with bromcresol green (SN), 617 relative affinity of hemoglobin S and hemoglobin A for CO and oxygen (SN), 83 screening cord bloods for detection of sickle cell disease in Jamaica, 666 standn. in abnormal hemoglobin detection: an evaluation of Hb electrophoresis kits, 591 EMIT system correlation of the EMIT urine barbiturate assay with a spectrophotometric serum barbiturate assay in suspected overdose (SN), 305

Emphysema automated measurement of protease-inhibitor capacity of serum, by use of chymotrypsin and casein, 328 Enzymatic assay measurement of antitrypsin in serum, by immunodiffusion and by enzymatic assay (SM), 396 Enzyme activity See also Kinetic enzyme activity, and specific enzyme of interest computer simulation and optimization, exemplified by enzyme-coupled aminotransferase (transaminase) assays, 1403 effect of energy-rich compounds on release of intracellular enzymes from human leukocytes and rat lymphocytes, 1331 evaln. of a Gilford "Automatic Enzyme Analyzer" modified to assay 60 samples per hour, 1295 optimization and anal. applications of the techniques of dynamic introdn. of liquids into centrifugal analyzers (S), 932 standardization of serum ceruloplasmin concns. in International Enzyme Units with o-dianisidine dihydrochloride as substrate, 1564 Enzyme analyzer clin. trials of a new automatic ultramicro enzyme analyzer (A), 856 Enzyme assays expressing results of enzyme assays (L), 402 Enzyme kinetics zero-order kinetics? (L), 1245 Enzyme units international units for enzymes: help or hindrance? **methylmalonic aciduria** gas-chromatographic detn. of methylmalonic acid in urine and serum, 444  
**Methylphenidate hydrochloride** GLC procedure for measurement of methylphenidate hydrochloride and its metabolite, ritalinic acid, in urine, 440  
**Methylumbelliferyl- $\alpha$ -galactosidase** variables in the laboratory diagnosis of Fabry's disease by measurement of methylumbelliferyl- $\alpha$ -galactosidase activity, 383  
**Mineral metabolism** trace-element analysis in hair: an evaluation, 148  
**Morphine** quant. anal. of morphine in urine by GC:chemical ionization-mass spectrometry, with [ $N\text{-C}_2\text{H}_5$ ]morphine as an internal std. 465 simple, accurate, and sensitive quantitative method for the detn. of morphine (A), 901 use of XAD-2 resin for detection of abused drugs in urine, 177

**Multicomponent analysis** automatic mass-spectrometric analysis: prelim. report on development of a novel mass-spectrometric system for biomed. appns. (S), 998  
**Multiphasic testing** a comparison of observed vs. statistically expected abnormal individuals and age-sex correction of results in a multiphasic testing program (A), 865  
**Multiple sclerosis** comparison of electroimmundiffusion and radial immunodiffusion for measurement of IgG in lab. diagnosis of multiple sclerosis, 141  
**Mutiphasic analysis** drug-abuse and control populations differentd. by a laboratory profile, 172 multivariate anal. of serum protein assays in chronic hepatitis and postneurotic cirrhosis, 428  
**Muramidase** detn. of human muramidase (lysozyme) in body fluids by radioimmunoassay (A), 884  
**Muscular dystrophy** creatine kinase isoenzymes in muscular dystrophy (A), 865  
**Myocardial infarction** optimal  $\alpha$ -oxobutyrate concn. for assay of  $\alpha$ -hydroxybutyrate dehydrogenase activity in normal and pathological sera at 30 °C (SN), 494  
**NAD** a redetn. of the molar absorptivity of reduced NAD (A), 882  
**NADH** measurement of adenosine-5'-triphosphatase by coupling to NADH oxidation (A), 886  
**National Registry in Clinical Chemistry** national registry in clinical chemistry, 1391  
**Nephelometry** advantages and disadvantages of nephelometric measurement of serum lipids (SN), 502 kinetics of the IgG-anti-IgG reaction, as evaluated by conventional and stopped-flow nephelometry (S), 1071 optimizing nephelometric measurement of specific serum proteins: Evaln. of three diluents, 1548 polymer enhancement of automated immunological nephelometric anal., as illustrated by detn. of urinary albumin, 415  
**Nervous system disease** measurement of IgG and albumin content of cerebrospinal fluid, and its interpretation, 571  
**Neuraminic acid** evaluation of 1,10-phenanthroline as a reagent for sialic acid determinations (SN), 387  
**Neutron-activation anal.** Mn, Cu, and Zn concns. in serum and packed blood cells during acute hepatitis, chronic hepatitis, and posthepatitic cirrhosis, 1141  
**Newborns** See Pediatric chemistry  
 detn. of unbound bilirubin in serum of newborns, 783 thin-layer chromatographic screening of amino acids in plasma and urine of newborns, 1446  
**Ninth International Congress on Clinical Chemistry** Ninth International Congress on Clinical Chemistry, 1487  
**Nitrazepam** quantitative determination of medazepam, diazepam, and nitrazepam in whole blood by flame-ionization gas-liquid chromatography, 141  
**Noradrenaline** simultaneous automated estn. of noradrenaline and dopamine in brain tissue (SN), 81  
**Normal range** evaluation of a transformation method for estn. of normal range, 576  
**Normal values** adaptation of the glucose oxidase: peroxidase-3-methyl-2-benzothiazolinone hydrazone-N,N-dimethylaniline procedure to the SMA 12:60, and comparison with other automated methods for glucose, 595 assay for tryptophan and its 5-hydroxyindole metabolites in blood, 812  
 automated detn. of serum hexosaminidase A by pH inactivation for detection of Tay-Sachs disease heterozygotes, 538 clinical evaln. of kinetic enzymatic fixed-time and integral analysis of serum triglycerides, 476 comparison of electroimmundiffusion and radial immunodiffusion for measurement of IgG in lab. diagnosis of multiple sclerosis, 1441 detn. of aminolauvinate dehydratase acty. of human erythrocytes as index of lead exposure, 1287 development and application of a radioimmunoassay for plasma glucagon, 566 effect of venous occlusion of the arm on the concn. of cal in serum, and methods for its compensation, 529 effects of intra- and interindividual variation on appropriate use of normal ranges, 1535 evaln. of an enzymatic procedure for detn. of serum cholesterol with the Abbott ABA-100, 1282 higher Cu concns. in serum than in plasma (SN), 1233 immunoglobulin concns. in sera of normal children: quantitation against an international reference preparation, 656 ion-exchange chromatography of amino acids in sweat collected from healthy subjects during sauna bathing, 1305 measurement of glucose-6-phosphate dehydrogenase and 6-phosphogluconate dehydrogenase activities in erythrocytes by use of a centrifugal analyzer, 1349 measurement of IgG and albumin content of cerebrospinal fluid, and its interpretation, 571 Mn, Cu, and Zn concns. in serum and packed blood cells during acute hepatitis, chronic hepatitis, and posthepatitic cirrhosis, 1141 multivariate anal. of serum protein assays in chronic hepatitis and postneurotic cirrhosis, 428 normal values for pediatric chemistry, 1098 optimal  $\alpha$ -oxobutyrate concn. for assay of  $\alpha$ -hydroxybutyrate dehydrogenase activity in normal and pathological sera at 30 °C (SN), 494 parameters affecting a method in which Sephadex is used to determine percentage of free thyroxine in serum, 1568 parathyroid hormone assay in primary hyperparathyroidism: experiences with a radioimmunoassay based on commercially available reagents, 369 plasma corticotropin radioimmunoassay, with use of fuller's earth for extn. 682 plasma cortisol detn.: radioimmunoassay and competitive protein binding compared, 411 protein-binding assay for plasma testosterone, after purif. by column partition chromatography, 430 radioimmunoassay of calcitonin in human plasma, 337 radioimmunoassay of serum triiodothyronine on small reusable Sephadex columns, 1353 sepn. and quantitation of coproporphyrin and uroporphyrin in urine, 1397 simplified colorimetry of  $\alpha$ -amino nitrogen in plasma, serum, or urine, 1553 simultaneous detn. of methemoglobin and total hemoglobin by a continuous-flow method, 1116 single-antibody technique for radioimmunoassay of cortisol in unextracted serum or plasma, 365 specific automated method for measurement of urinary hydroxyproline, 544 stability in urea as a measure of cardiac lactate dehydrogenase on the centrifugal analyzer, 769 standardization of serum ceruloplasmin concns. in International Enzyme Units with o-dianisidine dihydrochloride as substrate, 1564 techniques of orthomolecular diagnosis (S), 961 thermal titration: application of calorimetry to the study of plasma coagn. (S), 1013 urinary excretion of D-glucaric acid by normal individuals, 1155

- urinary excretion of non-nitrogenous organic acids by healthy infants and children, 603
- variables in the laboratory diagnosis of Fabry's disease by measurement of methylumbelliferyl- $\alpha$ -galactosidase activity, 383
- Nucleosides**
- quant. anal. of nucleosides in clin. specimens by gas chromatography (A), 874
- Nucleotides**
- use of high-pressure liquid chromatography to investigate alterations caused by disease in nucleotide profiles of human blood (A), 900
